Teaching & Learning: Principles and Practices | Center for Career Development

The benefits and challenges of online learning have changed the landscape for educators. It is essential to think reflectively about one's teaching and learning goals to ensure success.

Reflective Teaching involves examining one's underlying beliefs about teaching and learning and one's alignment with actual classroom practice before, during and after a course is taught. When teaching reflectively, instructors think critically about their teaching and look for evidence of effective teaching.

Reflective teaching is a process of inquiry, self-examination, and self-critique. Instructors reflect on their teaching practices and consider how they can improve student learning.

The "Teaching & Learning - Foundations of Distance Education" course focuses on the principles and practices of distance education. It covers the essential concepts and strategies for successful online teaching.
