My wife, Penny, and I would read to our kids every night when they were young. From infancy until they could read themselves, and even beyond that, we were active readers. Somehow, picking up those books and diving into the stories and characters and ideas and worlds they contained gave us both a way of looking at the world and our place in it, a way of thinking and talking about the world and our place in it. [Read More]

Childcare, including home-based care, was essential to the recovery of the Great Depression. But today, in the age of child poverty, childcare is less essential—yet more economically important. It is a paradox of the new age of child poverty. [Read More]
